

ADVANCED CERTIFICATE IN HEALTH MANAGEMENT

Dr. Marc Aguirre

Dr Aguirre is the Country Director for HOPE Worldwide in South Africa and he's also the regional Technical Advisor for HOPE Worldwide programmes in Africa.

According to Dr Aguirre the course has equipped him with additional skills and tools to "better assist both local South African partners and country programmes in 7 African countries."

Dr Aguirre has only good things to say about his experience with FPD. He states that FPD is filling a very important niche and gap in health systems skills development, and is playing a critical role in building the capacity of health care providers to address health and welfare issues more effectively.

"Skills I've gained through FPD include: resource mobilisation, business plan development and communication plan development."
