

# ADVANCED HEALTH MANAGEMENT PROGRAMME

## Ms. Beth Wilkinson

Beth is a Dietician for the that'sit Programme in Knysna. She says that after completing the AHMP course she had more confidence to present reports, powerpoint presentations and proposals.

*"The course helped me improve in the area of human resource management, I am able to handle and motivate my staff better than before the course. I have also been able to write proposals, a skill I did not have before the course. In addition, I have carried out action research after the course and I had the opportunity to present this at a TB conference recently."*
