

ADVANCED HEALTH MANAGEMENT PROGRAMME

Dr. Penny Mkalipe

Penny has been working as the Chief Medical Officer at ESKOM since March 2005. Before that she was a consultant in Occupational Health and managed her own private medical practice as a General Practitioner (GP) in Soweto.

“The course assisted me with better skills to manage all the aspects of my working life. In particular:

- How to deal and manage employees better using the various leadership styles.
- The writing of a grant proposal. (I recently did one for an organisation I support. I applied all that I learnt during the course and got the funding!)
- My major weakness before was managing a project and the course has helped me so much. I now get excited with any project at work as applying all what I learnt really empowered me.”

“The FPD is an excellent institution of learning. The courses are so relevant, practical, helpful and extremely empowering. The staff was very helpful and professional in all they did. The lecturers were a GREAT pleasure to listen to in class because they had expert knowledge and experience in the various subjects they taught us. It was a true privilege for me to have had the opportunity to do the course. Thank you.”

“I would like to explore and register another course run by the FPD. I have some of my staff now registered in the various other courses provided by the FPD, too.”

“Thank you very much for doing such a great job in ensuring that health managers perform well in their organisations.”
